Note
- Do not operate the unit or disconnect the power cable and network cables while updating.
- When Internet speed is not fast enough or the unit is connected to the wireless network via a wireless network adapter, network update may not be possible depending on the condition of the wireless connection. In this case, try again or update the firmware using a USB memory device. The firmware can be downloaded from the Yamaha Website.

To update the firmware using a USB memory device

You can download the firmware to a USB memory device, and connect that USB memory device to the USB jack on the unit.

- Select [USB] in step 4 to start the update.
