Owner's Manual EN

SPECIAL MESSAGE SECTION

This product utilizes batteries or an external power supply (adapter). DO NOT connect this product to any power supply or adapter other than one described in the manual, on the name plate, or specifically recommended by Yamaha.

This product should be used only with the components supplied or; a cart, rack, or stand that is recommended by Yamaha. If a cart, etc., is used, please observe all safety markings and instructions that accompany the accessory product.

SPECIFICATIONS SUBJECT TO CHANGE:
The information contained in this manual is believed to be correct at the time of printing. However, Yamaha reserves the right to change or modify any of the specifications without notice or obligation to update existing units.

This product, either alone or in combination with an amplifier and headphones or speaker/s, may be capable of producing sound levels that could cause permanent hearing loss. DO NOT operate for long periods of time at a high volume level or at a level that is uncomfortable. If you experience any hearing loss or ringing in the ears, you should consult an audiologist.
IMPORTANT: The louder the sound, the shorter the time period before damage occurs.

NOTICE:
Service charges incurred due to a lack of knowledge relating to how a function or effect works (when the unit is operating as designed) are not covered by the manufacturer's warranty, and are therefore the owners responsibility. Please study this manual carefully and consult your dealer before requesting service.

ENVIRONMENTAL ISSUES:
Yamaha strives to produce products that are both user safe and environmentally friendly. We sincerely believe that our products and the production methods used to produce them, meet these goals. In keeping with both the letter and the spirit of the law, we want you to be aware of the following:

Battery Notice:
This product MAY contain a small non-rechargeable battery which (if applicable) is soldered in place. The average life span of this type of battery is approximately five years. When replacement becomes necessary, contact a qualified service representative to perform the replacement.

This product may also use "household" type batteries. Some of these may be rechargeable. Make sure that the battery being charged is a rechargeable type and that the charger is intended for the battery being charged.

When installing batteries, do not mix batteries with new, or with batteries of a different type. Batteries MUST be installed correctly. Mismatches or incorrect installation may result in overheating and battery case rupture.

Warning:
Do not attempt to disassemble, or incinerate any battery. Keep all batteries away from children. Dispose of used batteries promptly and as regulated by the laws in your area. Note: Check with any retailer of household type batteries in your area for battery disposal information.

Disposal Notice:
Should this product become damaged beyond repair, or for some reason its useful life is considered to be at an end, please observe all local, state, and federal regulations that relate to the disposal of products that contain lead, batteries, plastics, etc. If your dealer is unable to assist you, please contact Yamaha directly.

NAME PLATE LOCATION:
The name plate is located on the bottom of the product. The model number, serial number, power requirements, etc., are located on this plate. You should record the model number, serial number, and the date of purchase in the spaces provided below and retain this manual as a permanent record of your purchase.

Model _____

Serial No. _____

Purchase Date _____

PLEASE KEEP THIS MANUAL

PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

* Please keep this manual in a safe place for future reference.

⚠ WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

Power supply/AC power adaptor

- Only use the voltage specified as correct for the instrument. The required voltage is printed on the name plate of the instrument.
- Use the specified adaptor (PA-130 or an equivalent recommended by Yamaha) only. Using the wrong adaptor can result in damage to the instrument or overheating.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.
- Do not place the AC adaptor cord near heat sources such as heaters or radiators, and do not excessively bend or otherwise damage the cord, place heavy objects on it, or place it in a position where anyone could walk on, trip over, or roll anything over it.

Do not open

- Do not open the instrument or attempt to disassemble the internal parts or modify them in any way. The instrument contains no user-serviceable parts. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

Water warning

- Do not expose the instrument to rain, use it near water or in damp or wet conditions, or place containers on it containing liquids which might spill into any openings.
- Never insert or remove an electric plug with wet hands.

Fire warning

- Do not put burning items, such as candles, on the unit.
  A burning item may fall over and cause a fire.

If you notice any abnormality

- If the AC adaptor cord or plug becomes frayed or damaged, or if there is a sudden loss of sound during use of the instrument, or if any unusual smells or smoke should appear to be caused by it, immediately turn off the power switch, disconnect the adaptor plug from the outlet, and have the instrument inspected by qualified Yamaha service personnel.

⚠ CAUTION

Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the instrument or other property. These precautions include, but are not limited to, the following:

Power supply/AC power adaptor

- When removing the electric plug from the instrument or an outlet, always hold the plug itself and not the cord.
- Unplug the AC power adaptor when not using the instrument, or during electrical storms.
- Do not connect the instrument to an electrical outlet using a multiple-connector. Doing so can result in lower sound quality, or possibly cause overheating in the outlet.

Battery

- Always make sure all batteries are inserted in conformity with the +/- polarity markings. Failure to do so might result in overheating, fire, or battery fluid leakage.
- Always replace all batteries at the same time. Do not use new batteries together with old ones. Also, do not mix battery types, such as alkaline batteries with manganese batteries, or batteries from different makers, or different types of batteries from the same maker, since this can cause overheating, fire, or battery fluid leakage.
- Do not dispose of batteries in fire.

- Do not attempt to recharge batteries that are not intended to be charged.
- When the batteries run out, or if the instrument is not to be used for a long time, remove the batteries from the instrument to prevent possible leakage of the battery fluid.
- Keep batteries away from children.
- If the batteries do leak, avoid contact with the leaked fluid. If the battery fluid should come in contact with your eyes, mouth, or skin, wash immediately with water and consult a doctor. Battery fluid is corrosive and may possibly cause loss of sight or chemical burns.

Location

- Do not expose the instrument to excessive dust or vibrations, or extreme cold or heat (such as in direct sunlight, near a heater, or in a car during the day) to prevent the possibility of panel disfiguration or damage to the internal components.
- Do not use the instrument in the vicinity of a TV, radio, stereo equipment, mobile phone, or other electric devices. Otherwise, the instrument, TV, or radio may generate noise.
- Do not place the instrument in an unstable position where it might accidentally fall over.

(4)-11 1/2

- Before moving the instrument, remove all connected adaptor and other cables.
- When setting up the product, make sure that the AC outlet you are using is easily accessible. If some trouble or malfunction occurs, immediately turn off the power switch and disconnect the plug from the outlet. Even when the power switch is turned off, electricity is still flowing to the product at the minimum level. When you are not using the product for a long time, make sure to unplug the power cord from the wall AC outlet.
- Use only the stand specified for the instrument. When attaching the stand or rack, use the provided screws only. Failure to do so could cause damage to the internal components or result in the instrument falling over.

Connections

- Before connecting the instrument to other electronic components, turn off the power for all components. Before turning the power on or off for all components, set all volume levels to minimum. Also, be sure to set the volumes of all components at their minimum levels and gradually raise the volume controls while playing the instrument to set the desired listening level.

Maintenance

- When cleaning the instrument, use a soft, dry cloth. Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

Handling caution

- Do not insert a finger or hand in any gaps on the instrument.
- Never insert or drop paper, metallic, or other objects into the gaps on the panel or keyboard. If this happens, turn off the power immediately and unplug the power cord from the AC outlet. Then have the instrument inspected by qualified Yamaha service personnel.
- Do not place vinyl, plastic or rubber objects on the instrument, since this might discolor the panel or keyboard.
- Do not rest your weight on, or place heavy objects on the instrument, and do not use excessive force on the buttons, switches or connectors.
- Do not use the instrument/device or headphones for a long period of time at a high or uncomfortable volume level, since this can cause permanent hearing loss. If you experience any hearing loss or ringing in the ears, consult a physician.

Yamaha cannot be held responsible for damage caused by improper use or modifications to the instrument, or data that is lost or destroyed.

Always turn the power off when the instrument is not in use.

When using a power adaptor, even when the power switch is in the "STANDBY" position, electricity is still flowing to the instrument at the minimum level. When you are not using the instrument for a long time, make sure you unplug the AC power adaptor from the wall AC outlet.

Make sure to discard used batteries according to local regulations.

- The illustrations and LCD screens as shown in this owner's manual are for instructional purposes only, and may appear somewhat different from those on your instrument.

*Congratulations and thank you for purchasing
the Yamaha PSR-E213/YPT-210 PORTATONE!*

*Please read this owner's manual carefully before using the instrument
in order to take full advantage of its various features.
Make sure to keep this manual in a safe and handy place even after you finish reading,
and refer to it often when you need to better understand an operation or function.*

Panel logos

GM System Level 1

"GM System Level 1" is an addition to the MIDI standard which ensures that any GM-compatible music data can be accurately played by any GM-compatible tone generator, regardless of manufacturer. The GM mark is affixed to all software and hardware products that support GM System Level.

Stereo Sampled Piano

The instrument has a special Portable Grand Piano Voice—created by state-of-the-art stereo sampling technology and using Yamaha's sophisticated AWM (Advanced Wave memory) tone generation system.

Yamaha Education Suite 5

The instrument features the new Yamaha Education Suite—a set of learning tools that utilize the latest technology to make studying and practicing music more fun and fulfilling than ever before!

XGlite

As its name implies, "XGlite" is a simplified version of Yamaha's high-quality XG tone generation format. Naturally, you can play back any XG song data using an XGlite tone generator. However, keep in mind that some songs may play back differently compared to the original data, due to the reduced set of control parameters and effects.

Supplied Accessories

The PSR-E213/YPT-210 package includes the following items. Please check that you have them all.

- **Music rest**   • **Owner's manual (this book)**

● **Music rest**

Insert the music rest into the slots as shown.

Contents

Setting Up

Be sure to do the following operations BEFORE turning on the power.

Power Requirements

Although the instrument will run either from an optional AC adaptor or batteries, Yamaha recommends use of an AC adaptor whenever possible. An AC adaptor is more environmentally friendly than batteries and does not deplete resources.

■ Using an AC Power Adaptor

❶ Make sure that the power of the instrument is off (display is blank, except for notation staff).

> ⚠ **WARNING**
> - **Use the specified adaptor (PA-130 or an equivalent recommended by Yamaha) only. The use of other adaptors may result in irreparable damage to both the adaptor and the instrument.**

❷ Connect the AC power adaptor to the power supply jack.

❸ Plug the AC adaptor into an AC outlet.

> ⚠ **CAUTION**
> - **Unplug the AC Power Adaptor when not using the instrument, or during electrical storms.**
■ Using Batteries

❶ Open the battery compartment cover located on the instrument's bottom panel.
❷ Insert the six new alkaline batteries, being careful to follow the polarity markings on the side of the compartment.
❸ Replace the compartment cover, making sure that it locks firmly in place.

> ⚠ **CAUTION**
> - **Never connect or disconnect the AC power adaptor when the power is on and the batteries are installed. Doing so will turn the power off.**
For battery operation the instrument requires six 1.5V "AA" size, LR6 or equivalent batteries. (Alkaline batteries are recommended.) When battery power becomes too low for proper operation, the volume may be reduced, the sound may be distorted, and other problems may occur. When this happens, make sure to replace all batteries, following the precautions listed below.

> ⚠ **CAUTION**
> - **Use alkaline batteries for this instrument. Other types of batteries (including rechargeable batteries) may have sudden drops of power when battery power becomes low.**
> - **Make sure to install the batteries with the proper orientation, maintaining the correct polarity (as shown). Incorrect battery installation may result in heat, fire and/or leaking of corrosive chemicals.**
> - **When the batteries run down, replace them with a complete set of six new batteries. NEVER mix old and new batteries. Do not use different kinds of batteries (e.g. alkaline and manganese) at the same time.**
> - **If the instrument is not to be in use for a long time, remove the batteries from it, in order to prevent possible fluid leakage from the battery.**

Make all necessary connections BEFORE turning the power on.

Connecting headphones (PHONES/OUTPUT Jack)
The PSR-E213/YPT-210 speakers are automatically shut off when a plug is inserted into this jack. The PHONES/OUTPUT jack also functions as an external output.

You can connect the PHONES/OUTPUT jack to a keyboard amplifier, stereo system, mixer, tape recorder, or other line-level audio device to send the instrument's output signal to that device.

⚠️ **WARNING**

- **Avoid listening with the headphones at high volume for long periods of time; doing so may not only result in ear fatigue, it may be damaging to your hearing.**

⚠️ **CAUTION**

- **To prevent damage to the speakers, set the volume of the external devices at the minimum setting and turn power off the devices before connecting them. Failure to observe these precautions may result in electric shock or equipment damage. Also, be sure to set the volumes of external devices at their minimum levels and gradually raise the volume controls while playing the instrument to set the desired listening level.**

Connecting a footswitch (SUSTAIN Jack)
The sustain function lets you produce a natural sustain as you play by pressing an optional footswitch. Plug the Yamaha FC4 or FC5 footswitch into this jack and use it to switch sustain on and off.

📝 **NOTE**

- *Make sure that the footswitch plug is properly connected to the SUSTAIN jack before turning on the power.*
- *Do not press the footswitch while turning the power on. Doing this changes the recognized polarity of the footswitch, resulting in reversed footswitch operation.*

Using the MIDI Terminals
The instrument also features MIDI terminals, allowing you to interface the instrument with other MIDI instruments or computers. (For more information, see page 50.)

📝 **NOTE**

- *MIDI cables (sold separately) must be used for connecting to MIDI devices. They can be bought at music stores, etc.*

Turn on the power

Press the [STANDBY/ON] switch to turn on the power. Pressing the switch again turns the power off. When you first turn on the power, make sure to turn down the volume of the instrument by pressing the MASTER VOLUME [-] button several times. While playing the keyboard, adjust the volume level by using the MASTER VOLUME [+] and [-] buttons.
All panel settings as well as the settings made via the display are reset to their default values whenever the power is turned off.

⚠️ **CAUTION**

- **When using a power adaptor, even when the power is off, a small amount of electricity is still being consumed by the instrument. When you are not using the instrument for a long time, make sure to unplug the AC power adaptor from the wall AC outlet, and/or remove the batteries from the instrument.**

— Quick Guide —

Play with a Style

Selecting a rhythm of a Style

The Style feature provides backing and rhythm parts in a wide variety of musical categories, including rock, blues, techno and much more. Here's how to play a rhythm of a Style. The rhythm sound consists of percussion instruments.

1 Press the [STYLE] button.

The Style number and name are displayed.

Style number   Style name

SONG

7 8 9
− 0 +
·····RESET·····
3 Press the [START/STOP] button.

The Style rhythm will start.
You can stop playback at any time by pressing the [START/STOP] button.

START/STOP
📝 NOTE

• Since the Pianist category Styles (093–100) have no rhythm parts, no sound will be produced if you start rhythm-only playback. To use these Styles, turn on the auto accompaniment and play the keyboard as described on pages 22–23. (The bass and chord accompaniment parts will sound.)

Playing with a Style

On the previous page, you've learned how to select your favorite rhythm of a Style. Here, you'll learn how to expand on that rhythm with bass and chord backing, and use all of it as your accompaniment as you play.

1 Press the [STYLE] button and then select a Style.

2 Turn auto accompaniment on.

Press the [ACMP ON/OFF] button.
Press the [ACMP ON/OFF] button again to turn the auto accompaniment off.

Appears when auto accompaniment is on
● **When auto accompaniment is on ...**

The keys to the left of the Split Point (54; F♯2) will play only chords.

This is known as the "Auto Accompaniment range."

Split Point (54; F♯2)

Auto Accompaniment range
> **NOTE**
>
> • You can change the Split Point. Refer to "Setting the Split Point" on page 36.

3 Turn SYNC START on.

Press the [SYNC START] button.

Flashes when Sync Start is on.
When the Sync Start standby mode is engaged, Style playback will begin as soon as you play a chord in the accompaniment range of the keyboard. You can turn off Sync Start standby mode by pressing the [SYNC START] button.

4 The Style will begin playing as soon as you play a chord in the accompaniment range of the keyboard.

Not sure how to play chords? No problem! This instrument is capable of playing chords even if you only play one key. Try playing one, two or three keys (any notes will do) in the auto accompaniment range of the keyboard. Different keys will produce different results.

Refer to page 44 for detailed instructions for playing chords.

Split Point

Beat Display

Indicates the beat of the current Style or Song with flashing arrows.

REVERB

Appears when Reverb is on (page 34).

REVERB
MASTER VOLUME indication

The value of MASTER is indicated by the number of bars in the display. The more bars shown, the higher the volume level. The range is from 0–14. One bar represents 2 steps in the value.

MAX — Sound level is 13–14

MASTER VOLUME
— Sound level is 3–4
— Sound level is 1–2

MIN — Sound level is 0 (no indication).
Chord Display

Indicates the name of the chord currently being played back, or the name of the chord being played on the keyboard.

ACMP ON

Appears when the auto accompaniment is on.

ACMP ON ◄

Keyboard Display

Indicates notes currently being played.
Indicates the melody and chord notes of a Song when the Song lesson function is in use. Also indicates the notes of a chord—either when playing a chord or when using the Dictionary function.

Song Lesson

Yamaha Education Suite 5

You can select any Song you like and use it for a left-hand, right-hand, or both-hands lesson. Song Lesson lets you learn how to play Songs in three easy steps.

■ **Lesson Flow**

| Select a Song for your lesson. | → | Select the part you want to practice. | → | Select the practice method. | → | **Start the Lesson!** |
■ **The practice methods:**

Lesson 1 (Listen & Learn) .... Listen and learn the melody or rhythm of a selected Song.
Lesson 2 (Timing) .... Learn to play the notes at the correct timing along with the Song.
Lesson 3 (Waiting) .... Learn to play the correct notes.

Lesson 1 (Listen & Learn)

There's no need to play the keyboard in Lesson 1.
The model melody/chords (in other words, the musical material you should learn) of the part you selected will sound. Listen to it carefully and learn it well.

1 **Select the desired Song for your lesson.**

Press the [SONG] button, and then select a Song (referring to the Song list on page 20) by using the number buttons [0]–[9], [+] and [-].

> **NOTE**
>
> • *You cannot select the part during Song playback before Lesson 1 starts. If a Song is currently being played back, stop the Song first, then continue from Step 2.*
2 Select the part you want to practice.

Press the [R] button for a right-hand lesson, [L] button for a left-hand lesson, or press both the [R] and [L] buttons simultaneously for a both-hands lesson. The selected part is displayed.

Left-hand lesson

```
[    ]    Left
```

LESSON PART

L   R

Right-hand lesson

```
[    ]    Right
```

LESSON PART

L   R

Both-hands lesson

```
[    ]    BothHand
```
3 Start Lesson 1.

Press the [LISTEN & LEARN] button to start Lesson 1.
The melody of the part you selected in Step *2* will sound. Listen to it carefully and learn it well.

LISTEN & LEARN

```
[ r1 ]    LISTEN
              REVERB
              011
       MEASURE
F
```
The notation and key positions of the model melody are shown in the display.

4 Stop the Lesson mode.

You can stop the Lesson mode at any time by pressing the [START/STOP] button.

📝 **NOTE**

• Even after Lesson 1 has started and the Song is playing, you can still select the part.

• When the melody Voice of the Song is changed, the key position shown in the display may be shifted (in octave units), depending on the Voice selected.

• You can select Lessons 1–3 by pressing the [LISTEN & LEARN], [TIMING] and [WAITING] buttons, respectively.

Lesson 2 (Timing)

In this lesson, try playing the notes with the correct timing. Simply concentrate on playing each note in time with the rhythmic accompaniment. The correct notes sound even if you play wrong notes as long as you play in time with the rhythm.

📝 **NOTE**

- *The Split Point is fixed and it cannot be changed. For the left-hand lesson, it is fixed at 59 or B2; for the left-hand chord lesson, it is fixed at 54 or F#2.*

1 Select a Song for your lesson.

2 Select the part you want to practice.

LESSON PART

L   R

📝 **NOTE**
- *You cannot select the part during Song playback before Lesson 2 starts. If a Song is currently being played back, stop the Song first, then continue from Step *2*.*

3 Start Lesson 2.

Press the [TIMING] button to start Lesson 2.

TIMING

```
[ r2 ]   TIMING        [
𝄢              REVERB      ●
         𝄞
              MEASURE 004   L R
|[   [keyboard display]
         C3
```

Play the notes shown in the display.
In Lesson 2, simply play each note in time with the music.

Songs 070–102 are intended specifically for chord playing lessons. When practicing the left parts of these Songs, play the notes in the Auto Accompaniment range.

📝 **NOTE**
- *Even after Lesson 2 has started and the Song is playing, you can still select the part.*
- *Regardless of how strongly you play the keys, the level of the sound does not change. As a result, your performance may not sound exactly like the model or example, depending on the selected song.*

4 Stop the Lesson mode.

You can stop the Lesson mode at any time by pressing the [START/STOP] button.

START/STOP
▶/■
Grade

When the lesson Song has played all the way through in Lesson mode 2 or 3, your performance will be evaluated in four levels: OK, Good, Very Good, or Excellent.

```
OK
Good
Very Good
Excellent
```

Lesson 3 (Waiting)

In this mode, try playing the correct notes. The notes you should play appear in the score and the keyboard on the display. The Song pauses until you play the right note.

1 **Select a Song for your lesson.**

2 **Select the part you want to practice.**

LESSON PART

Song settings

Changing the Melody Voice

You can change a Song's melody Voice to any other Voice you prefer.

1 Select the Song and play it.

Refer to the section "Playing Songs" on page 19.

2 Select the voice.

Select a desired Voice by using the number buttons [0]–[9], [+], [-].
The selected Voice sounds when you play the keyboard.
If a Song has played through and stopped during this procedure, press the [START/STOP] button to start playback again.

3 Press and hold the [VOICE] button for longer than a second.

"SONG MELODY VOICE" appears in the display for a few seconds, indicating that the Voice selected in Step **2** has replaced the Song's original melody Voice.

Hold for longer than a second.
Song Volume

This procedure allows you to adjust the balance between Song playback and the notes you play on the keyboard by setting the volume of the playback sound.

1 Press the [SONG] button.
2 Press the [FUNCTION] button a number of times until "SongVol" appears.

Current Song Volume   Song Volume

Practice Makes Perfect

You can repeatedly practice a section you find difficult. This function lets you specify a section of a Song you want to practice—"A" is the start point and "B" is the end point—for repeat playback.

Repeat playback of this section
1 Play the Song and press the [A-B REPEAT] button at the beginning of the section you want to repeat (the "A" point).
"A-REPEAT" will be displayed.

```
[A-  ]   REPEAT
```

2 Press the [A-B REPEAT] button a second time at the end of the section you want to repeat (the "B" point). The specified A-B section of the Song will now play repeatedly, letting you practice the section over and over.

```
[A-b]   REPEAT
```
You can stop repeat playback by pressing the [A-B REPEAT] button. The A-B REPEAT mode will be canceled and normal playback of the Song will continue.

```
[oFF]   REPEAT
```

NOTE

- *The repeat start and end points can be specified in one-measure increments.*
- *You can also set the A-B Repeat function when the Song is stopped. Simply use the [REW] and [FF] buttons to select the desired measures, pressing the [A-B REPEAT] button for each point, then start playback.*
- *If you want to set the start point "A" at the very beginning of the Song press the [A-B REPEAT] button before starting playback of the Song.*

NOTE

- *The A-B Repeat function will be canceled when you select another Song or Style mode.*

Play With a Variety of Effects

Adding Reverb

Reverb adds the ambience of a room or concert hall to the sound that you play on the keyboard.

To add Reverb

Press the [REVERB ON/OFF] button to turn Reverb on. Reverb is normally on. You can check how the selected Reverb Type sounds by playing the keyboard. To turn Reverb off, press the [REVERB ON/OFF] button again.
REVERB
Appears when Reverb is on.

Select a Reverb Type

The ideal type is automatically selected whenever you select a Song or Style, but you can select any of the available Reverb Types.

1 Press and hold the [REVERB ON/OFF] button for longer than a second. "REVERB" appears in the display for a few seconds, followed by the Reverb Type.
Hold for longer than a second.

〔 02 〕 Hall2   Currently selected Reverb Type

2 Select the desired Reverb Type by using the number buttons [0]–[9], [+], [-].
Refer to the Reverb Type list on page 63 for details.
You can adjust the Reverb depth in the Function Settings (page 49).

NOTE

- You can also access the Reverb Type setting display by pressing the [FUNCTION] button several times.
Adding Panel Sustain

This function adds a fixed sustain to the keyboard Voices.

1 Press the [FUNCTION] button a number of times until the "Sustain" item appears.

[oFF]   Sustain

Tuning

You can fine tune the pitch of the entire instrument. The overall tuning of the instrument can be shifted up or down by a maximum of 100 cents in 1-cent increments (100 cents = 1 semitone).

1 Press the [FUNCTION] button a number of times until "Tuning" appears.

Currently tuning value

[000] Tuning
2 Use the number buttons [0]–[9], [+] and [-] to set the Tuning value between -100 and +100 as required.
NOTE

- *The pitch of the Drum Kits Voices (Voice numbers 130–142) cannot be changed.*
- *Press the [+] and [-] buttons simultaneously to instantly reset the value to its default setting (000).*

One Touch Setting

Sometimes selecting the ideal Voice to play with a Song or Style can be confusing. The One Touch Setting feature automatically selects the most suitable Voice for you when you select a Style or Song. Simply select Voice number "000" to activate this feature.

1 Press the [VOICE] button, and then select Voice number "000" by using the number buttons [0]–[9], [+], [-].

SONG
STYLE
VOICE

Appears when One Touch Setting is on.

[000] SprnoSax
This turns the One Touch Setting feature on. One Touch Setting will be turned off if you select any other Voice number.

Changing the tempo of the Song/Style

Songs and Styles can be played at any tempo you desire—fast or slow.

1 Press the [TEMPO/TAP] button to call up the Tempo setting in the display after selecting a Style/Song.

Current Tempo value

[116] Tempo
2 Set the Tempo by using the number buttons [0]–[9], [+], [-].

You can also set the Tempo by simply tapping the [TEMPO/TAP] button at the required tempo—four times for time signatures in 4, and three times for time signatures in 3.
You can change the Tempo during Style/Song playback by pressing the [TEMPO/TAP] button just twice.

NOTE

• Press the [+] and [-] buttons simultaneously to instantly reset the value to the default tempo of a Style or Song.
Adjusting the Main Voice Parameters

The volume and octave (the pitch of the instrument can be shifted by up or down in octaves) for the main voice can be adjusted.

● **Main Voice Parameters (page 49)**
  • Main Voice Volume
  • Main Voice Octave

You can adjust each of the parameters above in the Function settings (page 49).

Style (Auto Accompaniment) Functions

Various ways to start and stop Style playback

Starting Style playback

The following three methods can be used to start Style playback. In all cases you will need to press the [ACMP ON/OFF] button to turn auto accompaniment on before actually starting Style playback. Whichever method you choose, you can press the [INTRO/ENDING/rit.] before starting playback. To begin your performance, an introduction will play automatically, then will automatically switch to the MAIN section when finished.
Appears when the auto accompaniment is on

■ **Immediate Start**

Press the [START/STOP] button to begin rhythm-only playback of the selected Style.
The bass and chords will begin playing as soon as you play a chord in the accompaniment range of the keyboard.
Immediate Start

■ **Chord Start**

Press the [SYNC START] button and the beat arrows will begin flashing, indicating that the Sync Start "standby" mode has been engaged.
The bass and chords will begin playing as soon as you play a chord in the accompaniment range of the keyboard.

Accompaniment range

■ **Tap Start**

You can supply a count-in at any tempo you like to start playback. Simply tap the [TEMPO/TAP] button at any tempo—4 times for time signatures in 4, and 3 times for time signatures in 3—and the selected Style rhythm will begin playing at the tapped tempo.
The bass and chords will begin playing as soon as you play a chord in the accompaniment range of the keyboard.
Start at the tapped tempo

Stopping Style playback

The following three methods can be used to stop Style playback.

■ **Immediate Stop**

Playback will stop as soon as you press the [START/STOP] button.
Immediate Stop

■ **Stop and Enter Sync Start Mode**

If you press the [SYNC START] button during Style playback, playback will stop immediately and the Sync Start standby mode will be engaged (beat arrows will flash).

Stop immediately and enter the Sync Start mode

Sync Start standby
■ **Play the Ending and Stop**

Press the [INTRO/ENDING/rit.] button to begin playing an ending section. Playback will stop when the ending has played all the way through.

Stop after ending plays
If you press the [INTRO/ENDING/rit.] button a second time (while the ending is playing), the ending will play in ritardando (the tempo will gradually get slower).

Pattern Variation (Sections)

The instrument features a wide variety of Style "sections" (patterns) that allow you to vary the arrangement of the accompaniment to match the Song you are playing.
● **INTRO section**
This is used for the beginning of the Song
When the intro finishes playing, accompaniment shifts to the main section.
The length of the intro (in measures) differs depending on the selected Style.

● **MAIN section**
This is used for playing the main part of the Song. It plays a main accompaniment pattern, and repeats indefinitely until another section's button is pressed. There are two variations on the basic pattern (A and B), and the Style playback sound changes harmonically based on the chords you play with your left hand.

● **Fill-in section**
This is automatically added before changing the section A and B.

● **ENDING section**
This is used for the ending of the Song. When the ending is finished, the auto accompaniment stops automatically. The length of the ending (in measures) differs depending on the selected Style.

1 Press the [STYLE] button and then select a Style.

2 Turn auto accompaniment on.

Press the [ACMP ON/OFF] button.

Appears when the auto accompaniment is on.
3 Turn SYNC START on.

Press the [SYNC START] button.

4 Press the [MAIN/AUTO FILL] button.

`MAIN A`

The name of the selected section—MAIN A or MAIN B—will be displayed
5 Press the [INTRO/ENDING/rit.] button.
`INTRO→A`

6 As soon as you play a chord with your left hand, the Intro of the selected Style starts.

For this example, play a C major chord (as shown below). For information on how to enter chords, see "Playing Auto Accompaniment Chords" on page 44.

Accompaniment range
7 Press the [MAIN/AUTO FILL] button.

`FILL A→B`
When the fill-in is finished, it leads smoothly into the selected main section A/B.

8 Press the [INTRO/ENDING/rit.] button.
`ENDING`

This switches to the ending section.
When the ending is finished, the auto accompaniment stops automatically. You can have the ending gradually slow down (ritardando) by pressing the [INTRO/ENDING/rit.] button again while the ending is playing back.

Adjusting the Style Volume

This procedure allows you to adjust the balance between Style playback and the notes you play on the keyboard by setting the volume of the playback sound.

1 **Press the [STYLE] button.**

2 **Press the [FUNCTION] button a number of times until the "StyleVol" appears.**

Current Style volume setting   Style Volume

FUNCTION
[*100*]   *StyleVol*

3 **Set the Style volume by using the number buttons [0]–[9], [+], [-].**

📝 NOTE

• Press the [+] and [-] buttons simultaneously to instantly reset the value to its default setting (100).

Playing Auto Accompaniment Chords

You've learned in the section "Play with a Style (Accompaniment)" on page 21 that the "feel" of the Style changes every time you play a chord on the left-hand side of the keyboard. Here, you'll learn the types of the chords and how to play them in greater detail. The examples of chords are given here in the key of C.

There are two basic ways (below) you can play the chords on the left-hand side of the keyboard, while playing the Style (page 22)

- **Easy Chords**
- **Standard Chords**

Split Point—default setting: 54 (F#2)

36   48   60   72   84   96
Easy Chords

This method lets you easily play chords in the accompaniment range of the keyboard using only one, two, or three fingers.

C
- **To play a major chord**
  Press the root note of the chord.

Cm
- **To play a minor chord**
  Press the root note together with the nearest black key to the left of it.

C7
- **To play a seventh chord**
  Press the root note together with the nearest white key to the left of it.

Cm7
- **To play a minor seventh chord**
  Press the root note together with the nearest white and black keys to the left of it (three keys altogether).

> **NOTE**
> • *Root notes and the corresponding keys*
>
> Accompaniment range
>
> C# Eb   F# Ab Bb   C# Eb   F#
> C D E F G A B C D E F

Standard Chords

This method lets you produce accompaniment by playing chords using normal fingerings in the accompaniment range of the keyboard.

C	C(9)	C$_6$	C$_6$(9)	CM$_7$	CM$_7$(9)	CM$_7$(#11)	C(b5)	CM$_7$b5
Csus$_4$	Caug	CM$_7$aug	Cm	Cm(9)	Cm$_6$	Cm$_7$	Cm$_7$(9)	Cm$_7$(11)
CmM$_7$	CmM$_7$(9)	Cm$_7$b5	CmM$_7$b5	Cdim	Cdim$_7$	C$_7$	C$_7$(b9)	C$_7$(b13)
C$_7$(9)	C$_7$(#11)	C$_7$(13)	C$_7$(#9)	C$_7$b5	C$_7$aug	C$_7$sus$_4$	C$_{1+2+5}$	

* Notes enclosed in parentheses are optional; the chords will be recognized without them.

One plus two plus five [1+2+5]	1 - 2 - 5	C1+2+5	C *

* These chords are not shown in the Chord Dictionary function.

NOTE

- Notes in parentheses can be omitted.
- Playing two same root keys in the adjacent octaves produces accompaniment based only on the root.
- A perfect fifth (1+5) produces accompaniment based only on the root and fifth which can be used with both major and minor chords.
- The chord fingerings listed are all in "root" position, but other inversions can be used—with the following exceptions: m7, m7♭5, 6, m6, sus4, aug, dim7, 7♭5, 6(9), 1+2+5
- Inversion of the 7sus4 and m7(11) chords are not recognized if the notes shown in parentheses are omitted.
- The auto accompaniment will sometimes not change when related chords are played in sequence (e.g. some minor chords followed by the minor seventh).
- Two-note fingerings will produce a chord based on the previously played chord.

Looking up Chords Using the Chord Dictionary

The Dictionary function is essentially a built-in "chord dictionary" that shows you the individual notes of chords. It is ideal when you know the name of a certain chord and want to quickly learn how to play it.

1 Press and hold the [WAITING] button for longer than a second. "Dict." will appear in the display.

WAITING
CHORD DICT.

Hold for longer than a second.

Dict.
2 As an example, we'll learn how to play a GM7 (G major seventh) chord. Press the "G" key in the section of the keyboard labeled "ROOT▶." (The note doesn't sound.) The root note you set is shown in the display.

Keys for chord type dictionary   Keys for root dictionary

ROOT▶ C   G

Dict.
REVERB
8va
MEASURE 001
G
C3
3 Press the "M7" (major seventh) key in the section of the keyboard labeled "CHORD TYPE▶." (The note doesn't sound.)
The notes you should play for the specified chord (root note and chord type) are shown in the display, both as notation and in the keyboard diagram.

CHORD TYPE▶ M   M7

Notation of chord

Dict.
REVERB
8va
MEASURE 001
G M7
C3

Chord name (root and type)   Individual notes of chord (keyboard)

To call up possible inversions of the chord, press the [+]/[-] buttons.

4 Try playing a chord in the auto accompaniment section of the keyboard, checking the indications in the display.
When you've played the chord properly, a bell sound signals your success and the chord name in the display flashes.

📝 **NOTE**
• Major chords are usually indicated by the root name only. For example, the indication "C" in a score refers to a "C Major" chord. To look up the fingering for a major chord press the root key and then the M chord type key.

■ About chords

Playing two or more notes together simultaneously creates a "chord."

Playing a note together with two other notes spaced three notes (steps) apart—such as the notes C, E and G—creates a harmonious sound. Chords like these are called "triads" and they play an important role in most music.

3rd   Root   3rd
Taking the chord above as an example, the lowest note of this triad is called the "root note." This is the central note sound, and it supports or anchors the rest of the notes chord.
You'll notice that the middle note of the chord above (E) is the third step in the succession of scale notes—C, D, then E. There are two types of "thirds" in chords: major thirds and minor thirds.

Major third—four half steps from the root   **Minor third**—three half steps from the root

We'll also alter the top note of our original chord and make three additional chords, as shown below. (The captions indicate the intervals between each of the notes.)

◆ Major chord	◆ Minor chord	◆ Augmented chord	◆ Diminished chord
C$_M$	C$_m$	C$_{aug}$	C$_{dim}$
Minor 3rd Major 3rd	Major 3rd Minor 3rd	Major 3rd Major 3rd	Minor 3rd Minor 3rd

The basic characteristics of the chord sound are same, no matter if we change the order of the notes from bottom to top, or if we add other same name notes in different octaves. Beautiful sounding harmonies can be built in this manner, and emotional music can be created by playing different chords one after the other according to commonly accepted rules. Harmony determines the nature of chords, and music is created based on harmony.

● Chord names

From the chord name, you can tell at a glance what type of chord it is and which notes make up the chord. Understanding the basic structure of chords is very useful—once you're familiar with this, you'll be quickly and easily play chords by looking at the names that appear above the notation.

Cm
Root note   Chord type

● Chord types (These chords are among those that can be recognized by the Fingered method.)

Function Settings

The [FUNCTION] button gives you access to a variety of operations related to adjusting or enhancing the sound and making settings for connection to external devices.

Select the item and change the value

There are 16 different items that can be set.

1 Press the [FUNCTION] button a number of times until desired item appears.

Each time the [FUNCTION] button is pressed 16 function items are displayed in sequence. The description and display sample is provided on the Function Setting List on page 49.

FUNCTION

[100]   StyleVol

Value   Function item
2 Set the value by using the number buttons [0]–[9], [+], [-].

For on/off settings, use [+]/[-] buttons.

● Function Setting List

Item	Display	Range/settings	Description
Style Volume	StyleVol	000–127	Determines the volume of the Style.
Song Volume	SongVol	000–127	Determines the volume of the Song.
Transpose	TransPos	-12–00–12	Determines the pitch of the instrument by semitone increments.
Tuning	Tuning	-100–000–100	Sets the pitch of the instrument's sound in 1-cent increments.
Split Point	SplitPnt	000–127 (C-2–G8)	Sets the Split "point"—in other words, the key that separates the auto accompaniment range and Main voice.
Main Voice Volume	M.Volume	000–127	Determines the volume of the Main Voice.
Main Voice Octave	M.Octave	-2–0–2	Determines the octave range for the Main Voice.
Reverb Type	Reverb	01–10	Determines the Reverb type, including off (10). Refer to the Reverb Type list on page 63.
Reverb Level	RevLevel	000–127	Determines how much of the Voice's signal is sent to the Reverb effect.
Panel Sustain	Sustain	ON/OFF	Determines whether or not Panel Sustain is always applied to the Main voice. Panel Sustain is applied continuously when ON, or not applied when OFF.
Local On/Off	Local	ON/OFF	Determines whether the instrument's keyboard controls the internal tone generator (ON) or not (OFF).
External Clock	ExtClock	ON/OFF	Determines whether the instrument synchronizes to the internal clock (OFF) or an external clock (ON).
Initial Setup Send	InitSend	YES/NO	Lets you send the data of the panel settings to a computer. Use the [+] button to transmit the data.
Time Signature	TimeSig	00–15	Determines the time signature of the Metronome.
Metronome Volume	MetroVol	000–127	Determines the volume of the Metronome.
Demo Cancel	D-Cancel	ON/OFF	Determines whether Demo cancel is enabled or not. When this is set to ON, the Demo Song will not play, even if the [DEMO] button is pressed.

About MIDI

The instrument features a MIDI terminals that can be connected to other MIDI instruments and devices for expanded musical functionality.

What is MIDI?

MIDI (Musical Instrument Digital Interface) is a world-standard interface for communication between electronic musical instruments and music devices. When MIDI-equipped instruments are connected via a MIDI cable, it becomes possible to transfer performance and setting data between them for significantly enhanced performance and production potential.

IN — MIDI — OUT

⚠ *CAUTION*

- *Connect the PSR-E213/YPT-210 to external equipment only after turning off power for all devices. Then, turn on the power, first to the PSR-E213/YPT-210, then to the connected external equipment.*

What You Can Do With MIDI

- Transferring performance and setting data between the PSR-E213/YPT-210 and MIDI-equipped instruments or computers. (page 51)

Transferring Performance Data To and From Another Instrument

By connecting the PSR-E213/YPT-210 to other MIDI devices or a computer, the performance data of the instrument can be used on those other MIDI devices or computer, and also the performance data from other MIDI devices and computer can be received and sounded with the PSR-E213/YPT-210.

● **When the instrument is connected with another MIDI device, it transmits/receives performance data.**
● **When the instrument is connected with a computer, it transmits/receives performance data.**
A Yamaha UX16 or similar USB-MIDI interface (sold separately) will be necessary for MIDI connection between the PSR-E213/YPT-210 and a USB-equipped computer.
Make sure to purchase a Yamaha UX16 or a quality USB-MIDI interface at a musical instrument store, computer store or electrical appliance store.
If you use the UX16 interface, install the driver supplied with the interface on your computer.

■ MIDI settings
These settings should be made when transmitting/receiving performance data to a connected MIDI device or computer.

Local Settings
Local Control determines whether or not notes played on the instrument are sounded by its internal tone generator system; the internal tone generator is active when local control is on, and inactive when local control is off.

On .... This is the normal setting in which notes played on the instrument's keyboard are sounded by the internal tone generator system. Data received via the instrument's MIDI terminal will also be played by the internal tone generator.

Off .... With this setting the instrument itself produces no sound (keyboard performance, or Style playback), but the performance data is transmitted via the MIDI terminal. Data received via the instrument's MIDI terminal will also be played by the internal tone generator.

You can set the Local Control in the Function Settings (page 49).

📝 **NOTE**
- *If you can't get any sound out of the instrument, Local Control may be the most likely cause. Playing the keyboard results in no sound when Local is set to OFF.*

External Clock Settings
These settings determine whether the instrument is synchronized to its own internal clock (OFF), or to a clock signal from an external device (ON).

On......... The instrument's time based functions will be synchronized to the clock from an external device connected to the MIDI terminal.

Off .... The instrument uses its own internal clock (default).

You can set the External Clock in the Function Settings (page 49).

📝 **NOTE**
- *If External Clock is ON and no clock signal is being received from an external device, the Song, Style, and metronome functions will not start.*

PSR-E213/YPT-210 Panel Setting Transmission (Initial Send)
Sends the PSR-E213/YPT-210 panel settings to an external MIDI device. When recording a PSR-E213/YPT-210 performance to an external sequencer or similar equipment, you can use this function to send the current PSR-E213/YPT-210 panel settings so that when the sequence is played back the original panel settings are automatically restored.
You can set Initial Send in the Function settings (page 49).

Troubleshooting

Problem	Possible Cause and Solution
When the instrument is turned on or off, a popping sound is temporarily produced.	This is normal and indicates that the instrument is receiving electrical power.
When using a mobile phone, noise is produced.	Using a mobile phone in close proximity to the instrument may produce interference. To prevent this, turn off the mobile phone or use it further away from the instrument.
There is no sound even when the keyboard is played or when a Song or Style is being played back.	Check that nothing is connected to the PHONES/OUTPUT jack on the rear panel. When a set of headphones is plugged into this jack, no sound is output.
	Check the Local Control on/off. (See page 52.)
Playing keys in the right hand area of the keyboard does not produce any sound.	When using the Dictionary function (page 46), the keys in the right hand area are used only for entering the chord root and type.
• The volume is too soft. • The sound quality is poor. • The rhythm stops unexpectedly or will not play. • The Song, etc. does not play correctly.	The batteries are low or dead. Replace all six batteries with completely new ones, or use the optional AC adaptor.
The Style or Song does not play back when the [START/STOP] button is pressed.	Is External Clock set to ON? Make sure External Clock is set to OFF; refer to "External Clock Settings" on page 52.
The Style does not sound properly.	Make sure that the Style Volume (page 43) is set to an appropriate level.
	Is the Split Point set at an appropriate key for the cords you are playing? Set the Split Point at an appropriate key (page 36). Is the "ACMP ON" indicator showing in the display? If it is not showing press the [ACMP ON/OFF] button so that it does show.
No rhythm accompaniment plays when the [START/STOP] button is pressed after selecting Style number 093–100 (Pianist).	This is not a malfunction. Style number 093–100 (Pianist) have no rhythm parts, so no rhythm will play. The other parts will begin playing when you play a chord in the accompaniment range of the keyboard if auto accompaniment is turned on.
Not all of the voices seem to sound, or the sound seems to be cut off.	The instrument is polyphonic up to a maximum of 32 notes. If a style or Song is playing back at the same time, some notes/sounds may be omitted (or "stolen") from the accompaniment or Song.
The footswitch (for sustain) seems to produce the opposite effect. For example, pressing the footswitch cuts off the sound and releasing it sustains the sounds.	The polarity of the footswitch is reversed. Make sure that the footswitch plug is properly connected to the SUSTAIN jack before turning on the power.
The ACMP ON indicator does not appear when the [ACMP ON/OFF] button is pressed.	Always press the [STYLE] button first when you are going to use any style-related function.
The part indications, such as Right, Left and Both Hands, do not appear—even when pressing the [R] or [L] buttons for the Lesson.	Make sure that you are not pressing the [R] or [L] buttons while the Song is playing. If you press one of the part buttons while playing the Song and before starting the Lesson, these buttons serve to mute the corresponding Song tracks. Stop the Song first, then select the desired part and start the Lesson.
Regardless of how strongly play the keys, the level of the sound does not change.	Since this keyboard does not have touch response, the level of the sound does not change in response to your playing strength.

Voice List

■ Maximum Polyphony

The instrument has 32-note maximum polyphony. This means that it can play a maximum of up to 32 notes at once, regardless of what functions are used. Auto accompaniment uses a number of the available notes, so when auto accompaniment is used the total number of available notes for playing on the keyboard is correspondingly reduced. The same applies to the Song functions. If the maximum polyphony is exceeded, earlier played notes will be cut off and the most recent notes have priority (last note priority).

> 📝 **NOTE**
>
> - The Voice List includes MIDI program change numbers for each voice. Use these program change numbers when playing the instrument via MIDI from an external device.
> - Program Numbers 001 to 128 directly relate to MIDI Program Change Numbers 000 to 127. That is, Program Numbers and Program Change Numbers differ by a value of 1. Remember to take this into consideration.
> - Some voices may sound continuously or have a long decay after the notes have been released while the sustain pedal (footswitch) is held.

Drum Kit List

- " ☐ " indicates that the drum sound is the same as "Standard Kit 1".
- Each percussion voice uses one note.
- The MIDI Note # and Note are actually one octave lower than keyboard Note # and Note. For example, in "Standard Kit 1", the "Seq Click H" (Note# 36/Note C1) corresponds to (Note# 24/Note C0).
- Key Off: Keys marked "O" stop sounding the instant they are released.
- Voices with the same Alternate Note Number (*1 … 4) cannot be played simultaneously. (They are designed to be played alternately with each other.)

Keyboard Note#	Keyboard Note	MIDI Note#	MIDI Note	Key Off	Alternate Group	130 — 127/0/1 — Standard Kit 1	131 — 127/0/2 — Standard Kit 2	132 — 127/0/9 — Room Kit	133 — 127/0/17 — Rock Kit	134 — 127/0/25 — Electronic Kit

MIDI Data Format

    • The values of "mm" and "ll" are used for MIDI Master Tuning.
    • The default value of "mm" and "ll" are 08H and 00H, respectively. Any values can be used for "n" and "cc."

    <Reverb Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 00H, mmH, llH, F7H
    • mm : Reverb Type MSB
    • ll : Reverb Type LSB
    Refer to the Effect Map (page 66) for details.

4   When the accompaniment is started, an FAH message is transmitted. When accompaniment is stopped, an FCH message is transmitted. When the clock is set to External, both FAH (accompaniment start) and FCH (accompaniment stop) are recognized.

5   Local ON/OFF
    <Local ON> Bn, 7A, 7F
    <Local OFF> Bn, 7A, 00
    Value for "n" is ignored.

6   Since this keyboard does not have touch response, the level of the sound does not change in response to your playing strength. As a result, when you play the keyboard, the velocity value transmitted via MIDI is fixed (set to the most suitable value for each Voice).
    However, the velocity of the accompaniment and song playback does change in response to performance data received via MIDI.

■ Effect map

* When a Type LSB value is received that corresponds to no effect type, a value corresponding to the effect type (coming the closest to the specified value) is automatically set.

* The numbers in parentheses in front of the Effect Type names correspond to the number indicated in the display.

Limited Warranty

90 DAYS LABOR   **1 YEAR PARTS**

Yamaha Corporation of America, hereafter referred to as Yamaha, warrants to the original consumer of a product included in the categories listed below, that the product will be free of defects in materials and/or workmanship for the periods indicated. This warranty is applicable to all models included in the following series of products:

PSR, YPT SERIES OF PORTATONE ELECTRONIC KEYBOARDS

If during the first 90 days that immediately follows the purchase date, your new Yamaha product covered by this warranty is found to have a defect in material and/or workmanship, Yamaha and/or its authorized representative will repair such defect without charge for parts or labor.

If parts should be required after this 90 day period but within the one year period that immediately follows the purchase date, Yamaha will, subject to the terms of this warranty, supply these parts without charge. However, charges for labor, and/or any miscellaneous expenses incurred are the consumers responsibility. Yamaha reserves the right to utilize reconditioned parts in repairing these products and/or to use reconditioned units as warranty replacements.

THIS WARRANTY IS THE ONLY EXPRESS WARRANTY WHICH YAMAHA MAKES IN CONNECTION WITH THESE PRODUCTS. ANY IMPLIED WARRANTY APPLICABLE TO THE PRODUCT, INCLUDING THE WARRANTY OF MERCHANT ABILITY IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY. YAMAHA EXCLUDES AND SHALL NOT BE LIABLE IN ANY EVENT FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow limitations that relate to implied warranties and/or the exclusion of incidental or consequential damages. Therefore, these limitations and exclusions may not apply to you.

This warranty gives you specific legal rights. You may also have other rights which vary from state to state.

CONSUMERS RESPONSIBILITIES

If warranty service should be required, it is necessary that the consumer assume certain responsibilities:

1. Contact the Customer Service Department of the retailer selling the product, or any retail outlet authorized by Yamaha to sell the product for assistance. You may also contact Yamaha directly at the address provided below.

2. Deliver the unit to be serviced under warranty to: the retailer selling the product, an authorized service center, or to Yamaha with an explanation of the problem. Please be prepared to provide proof purchase date (sales receipt, credit card copy, etc.) when requesting service and/or parts under warranty.

3. Shipping and/or insurance costs are the consumers responsibility.* Units shipped for service should be packed securely.

    *Repaired units will be returned PREPAID if warranty service is required within the first 90 days.

    IMPORTANT: Do NOT ship anything to ANY location without prior authorization. A Return Authorization (RA) will be issued that has a tracking number assigned that will expedite the servicing of your unit and provide a tracking system if needed.

4. Your owners manual contains important safety and operating instructions. It is your responsibility to be aware of the contents of this manual and to follow all safety precautions.

EXCLUSIONS

This warranty does not apply to units whose trade name, trademark, and/or ID numbers have been altered, defaced, exchanged removed, or to failures and/or damages that may occur as a result of:

1. Neglect, abuse, abnormal strain, modification or exposure to extremes in temperature or humidity.

2. Improper repair or maintenance by any person who is not a service representative of a retail outlet authorized by Yamaha to sell the product, an authorized service center, or an authorized service representative of Yamaha.

3. This warranty is applicable only to units sold by retailers authorized by Yamaha to sell these products in the U.S.A., the District of Columbia, and Puerto Rico. This warranty is not applicable in other possessions or territories of the U.S.A. or in any other country.

Please record the model and serial number of the product you have purchased in the spaces provided below.
