

S90 XS/S70 XS Editor V1.3.0 for Macintosh Release Notes

Main Revisions and Enhancements

V1.2.2 to V1.3.0

- Now supports Mac OS X 10.6 Snow Leopard.
- Fixed a problem in which a sound would sustain while using the Virtual Keyboard of Cubase.
- Reduced the launching time of the Editor.
- Solved some minor errors.

Known Issues

- The Mixing setup may not be recalled even if you store the current data of the Multi mode to a different Multi number then select the original Multi number again. To prevent such a situation, select another Multi number on the S90 XS Editor, then select the original Multi number, or select the original Multi number directly from the S90 XS instrument again.
